SHM encourages participation in the Research, Innovations, and Clinical Vignettes Scientific Abstract Competition as an integral part of the SHM Converge 2023 experience. Submit to present your work in front of a national audience or come see what your colleagues have been working on!

The Call for Abstracts and Conundrums is open through Tuesday, November 29, 2022. Abstract submitters will be notified of submission status in January 2023.

What to Expect Onsite

SHM is excited to announce that ePosters will be back for SHM Converge 2023! We know that tremendous work goes into each abstract, and SHM Converge will emphasize the importance of this work by scheduling time throughout the conference during which small groups of ePosters will be highlighted at each time.

ePosters also allow for engagement beyond the bounds of the presentation time! In addition to the ePoster presentations, SHM Converge will host an online gallery which allows for questions and comments that will be accessible for a minimum of 3 months after the conference.

Check out the SHM Converge 2022 ePoster Gallery!

Exciting Benefits of ePosters

- ePosters allow presenters to “go green” - no more wasted paper, printing costs, or transport hassle
- ePosters can increase engagement and visibility for abstracts, with potential for presenters to gain even more feedback on their work throughout the conference and in months after
- Scheduling is available in the conference app so you don’t miss an abstract!
- Conflicts in your planned schedule? You won’t miss your colleagues’ work with the ability to view all ePosters online throughout the conference and beyond
- Small presentation groups allow for more intimate engagement with viewers - and no standing around in a big poster hall for hours! Presenters now have time to see other ePosters as well.
